

Godwin Dri-Prime[®] Backup System

The Godwin Dri-Prime Backup System offers the peace-of-mind you can only find when you have a reliable contingency plan for your lift station. The Godwin Dri-Prime Backup System provides independently-powered pumping in one dependable package for a variety of emergency situations. With the availability of both backup pumping and backup power, the Dri-Prime Backup System can be engaged during primary power, switch gear and sewage pump failure or repair, and for primary pumping during routine maintenance. Because it is rated to meet the power and pumping demands of your system, the Godwin Dri-Prime Backup System is ready, willing and waiting to meet your needs - whenever you need it.

When maintaining system integrity is important, there's no better choice than the Godwin Dri-Prime Backup System.

Permanently installed Dri-Prime pump in Fort Story, VA.

Permanently installed Dri-Prime pump at Edenton, NC.

Features

- Pumping can continue despite power, switch gear or sewage pump failures.
- Acts as primary pumping system during routine maintenance and repair.
- Available in sizes 3" through 16" with flows to 10,000 GPM, heads to 600' and solids handling to 5" in diameter.
- PrimeGuard digital pump controller enables a seamless interface to existing control systems, thus allowing you to maintain remote monitoring and control.
- Optional sound-attenuated enclosure that provides sound levels as low as 64 dBA at 30'.
- Hinged, locking doors provide access to operating controls and service locations.
