BYPASS PUMPING

Heartland Pump Rental & Sales, Inc. is a company that specializes in sewer bypass pumping. Whether it be a simple one pump bypass to a 120 mgd bypass of the City of Memphis, TN, we have the experience and equipment to make every bypass successful.

Starting with our sales and engineering staff, that will provide a turn-key solution — to our certified setup technicians — to our factory trained mechanics providing pump watch — **WE'VE GOT YOU COVERED!**

Along with our personnel, Heartland Pump has invested in equipment that will not only complete your bypass, but will offer you different options to help reduce your costs from start to finish.

Starting with the Tracstar McElroy Fusion Machines and the Polyhorse pipe loading system, which can help you save on labor and bobcat expenses, to using a Murphymatic Control Panel that automatically starts/stops diesel pumps to save on diesel fuel, to having a fully stocked service truck with factory trained mechanics available 24/7 for on-site pump watch, servicing equipment, or for any unforeseen issues — Heartland Pump has what you need to complete your sewer bypass project.

For pricing or engineering assistance, please call 888-272-7143 and we will direct you to the sales representative in your area. Remember at Heartland Pump — **WE'VE GOT YOU COVERED!**
