## DREDGING

Heartland Pump Rental & Sales, Inc. has an SRS Crisafulli 180P Dredge in our rental fleet. This dredge has been used at coal mines, municipalities, and power generating plants — to name a few.

We have the dredge available for you to rent, or we offer factory trained dredging technicians that can setup and operate the dredge for your project.

Along with the dredge, we also offer hundreds of feet of discharge dredge hose for rent and booster pumps with accessories. We also have equipment using sound waves, that can “map” your project area — to help you determine if and where dredging is needed.

Along with our rental dredge, we also offer for sale, the complete line of SRS Crisafulli dredging products. Whether using a Rotomite or a FLUMP, SRS Crisafulli has a unit for your dredging needs.

For pricing or engineering assistance, please call 888-272-7143 and we will direct you to the sales representative in your area. Remember at Heartland Pump — WE'VE GOT YOU COVERED!
