## IMPELLER BALANCER

Heartland Pump Rental & Sales, Inc. finds itself in the ongoing quest to extend the life of, not only its own equipment, but to also help our customers extend the life of their equipment. To aid in that quest, we have a Hines Digital Impeller Balancer at our corporate repair center.

By balancing your impeller, you make your equipment run smoother. The smoother the equipment — the longer the life of the equipment — the less money you have in repair costs.

Our factory trained mechanics work to balance your impeller to factory specifications.

Along with balancing impellers, we also have the means to have your impeller specially coated to work with your particular environment. Whether it be — armolloyed, hard chromed, or brushed ceramic — we have the knowledge and the experience to increase the life of your impeller.

For a quote, please call 888-272-7143 and we will direct you to the sales representative in your area. Remember at Heartland Pump —WE'VE GOT YOU COVERED!
